Software Engineer with hands-on experience in full-stack web development using Next.js, Tailwind CSS, Python, Node.js, and MongoDB. Currently working at an early-stage startup building production-grade features. Strong foundation in scalable web applications, REST APIs, and collaborative product development.

WORK EXPERIENCE

Software Engineer

Cynchrony | July 2025 – Present

- Developing and scaling production-grade full-stack features for [cynchrony.in](#)
- Building responsive user interfaces using Next.js and Tailwind CSS.
- Implementing backend logic and APIs using Python.
- Collaborating closely with product team to design and ship new features quickly.
- Improving code quality, performance, and system reliability in a startup environment.

Intern – Quantum Cellular Automata (QCA)

IIIT Kancheepuram | May 2024

- Worked on development and analysis of computational models based on Quantum Cellular Automata.
- Conducted research and simulations for advanced computing architectures.

PROJECTS

SpyroSphere (B.E. Major Project) | 2024–25

- Developed a spherical surveillance robot with pendulum-based drive system.
- Integrated ESP32-CAM for live video streaming.
- Built AI-powered chatbot using React and Node.js.

ImaginAI

- Full-stack web application using React and Node.js.
- Generates images from text and voice prompts using Hugging Face models.
- Integrated NLP and image generation pipelines.

Real-Time Tic-Tac-Toe Game

- Implemented real-time multiplayer functionality using Socket.io.
- Developed backend services using Next.js, Node.js and Express.js.
- Built private room creation, live chat, turn-based notifications, and win detection features.
- Deployed a live, production-ready version of the application.

ScoreSync

- Full-stack live cricket scoring application inspired by Cricbuzz.
- Features include team creation, match scheduling, and real-time score updates.
- Built using React, Node.js, Express.js, MongoDB.

EDUCATION

B.E. in Electronics and Communication Engineering

Osmania University | June 2025

- Member of Electrical and Electronics Engineers (IEEE).
- Volunteer, Electronics and Telecommunication Engineers (IETE).

SKILLS & CERTIFICATIONS

Skills:

- **Frontend:** HTML, CSS, JavaScript, React.js, Next.js, Tailwind CSS
- **Backend:** Node.js, Express.js, Python
- **AI / GenAI:** LangChain, RAG
- **Programming:** C, Python

Certifications:

- Embedded Systems Developer – AICTE
- Certificate of Merit – IGNIUM 2022 (ISTE)
