Full-Stack Web & Mobile App Developer specializing in **React, React Native (Expo), Node.js, Express.js, and MongoDB**. Passionate about building scalable web and mobile applications, solving real-world problems, and continuously learning by developing impactful projects.

WORK EXPERIENCE

Software Developer

Cynchrony | July 2025 – Present

- Developing and scaling production-grade full-stack features for cynchrony.in
- Building responsive user interfaces using **Next.js** and **Tailwind CSS**.
- Implementing backend logic and **APIs** using **Python**.
- Collaborating closely with product team to design and ship new features quickly.
- Improving code quality, performance, and system reliability in a startup environment.

Intern – Quantum Cellular Automata (QCA)

IIIT Kancheepuram | May 2024

- Worked on development and analysis of computational models based on **Quantum Cellular Automata**.
- Conducted research and simulations for advanced computing architectures.

PROJECTS

SpyroSphere (B.E. Major Project) | 2024–25

- Developed a spherical surveillance robot with **pendulum-based drive system**.
- Integrated ESP32-CAM for live video streaming.
- Built AI-powered chatbot using **React** and **Node.js**.

NearBuzz – AI-Powered Event Discovery & Booking App

- An event discovery platform that helps users create, find, and book nearby events.
- Built using **React Native (Expo), Node.js, Express.js, and MongoDB**.
- Features include JWT authentication, event management, slot booking, profile management.
- Integrated **AI-powered event generation**, with an **AI assistant** currently under development.

DevPluse

- Built DevPulse, a full-stack coding platform using **Next.js, Node.js, Express, and MongoDB**.
- Implemented **JWT & Google OAuth authentication** with secure user management and protected APIs.
- Developed an online code editor, submission tracking, and leaderboard system to analyze developer performance.

ScoreSync

- Full-stack live cricket scoring application inspired by Cricbuzz.
- Features include team creation, match scheduling, and **real-time score updates**.
- Built using **React, Node.js, Express.js, MongoDB**.

EDUCATION

B.E. in Electronics and Communication Engineering

Osmania University | June 2025

- Member of Electrical and Electronics Engineers (IEEE).
- Volunteer, Electronics and Telecommunication Engineers (IETE).

SKILLS & CERTIFICATIONS

Skills:

- Frontend:** HTML, CSS, JavaScript, React.js, Next.js, Tailwind CSS, React Native
- Backend:** Node.js, Express.js, Python, PHP
- AI / GenAI:** LangChain, RAG, Git, GitHub, ChatGPT, GitHub Copilot, Claude, Gemini
- Programming:** C, Python

Certifications:

- Embedded Systems Developer – AICTE
- Certificate of Merit – IGNIUM 2022 (ISTE)
